

Dear All,

In relation to the earthquake that hit West Sumatra on Wednesday, 30 September 2009, at 17:16 local time, measuring 7.6 on the Richter Scale, we would like to inform you that one of our subsidiaries located in Indarung, West Sumatra, namely PT Semen Padang, is experiencing operational difficulties due to the earthquake.

The Company has assigned a Disaster Response Team to identify and inventory the impacts of the earthquake on the risk of damage to production equipment and other supporting facilities.

At this report was made, production activities of PT Semen Padang have been stopped temporarily and are experiencing some troubles, among others due to the unavailability of power supply from the State Electricity Company, PT Perusahaan Listrik Negara (PT PLN), which is the main supplier of electricity for PT Semen Padang. Although the power supply from PT PLN has now already been reconnected, comprehensive rechecking and rebalancing is being conducted to assure the safety of the production before restarting operations.

It is scheduled the initial start-up for all production equipments will be completed by Wednesday, October 7, 2009.

Please note that, according to data as per 2 October 2009, cement inventory of Semen Gresik Group is as follows:

1. Semen Gresik : 250,000 ton
2. Semen Padang : 240,000 ton
3. Semen Tonasa : 140,000 ton

Considering the daily released volume of Semen Gresik Group reaching 46,000 tons of cement on average, the aforementioned cement inventory as per 2 October 2009 is sufficient for assuring the Company's supply of cement for the next 13.7 days.

The Company, comprising Semen Gresik - Semen Padang - Semen Tonasa, will make all and any effort for assuring the supplies, especially the supply of cement in Sumatra for post-disaster purposes.

We also need to inform you that all assets of PT Semen Padang have been covered by "all risk" insurance, including coverage against disasters (earthquake).

This information is our valid provisional report in accordance with the condition and status at the time this report was made. We will provide further updates as to the condition of PT Semen Padang in accordance with the latest findings of the Disaster Response Team.

Hence our report, thank you for your kind attention.

Regards,

Agung Wiharto
